

Cloud Disaster Recovery for Database Backups

From Complex and Costly to Simple and Cost-Effective

Enterprise databases power critical applications, so they need powerful backup and disaster recovery strategies to assure availability and compliance of data. Legacy backup and DR solutions are costly and complex, and don't always provide the security and compliance that you need.

Is there a better way? Yes. You can go from complex and costly to simple and cost-effective when you leverage the cloud.

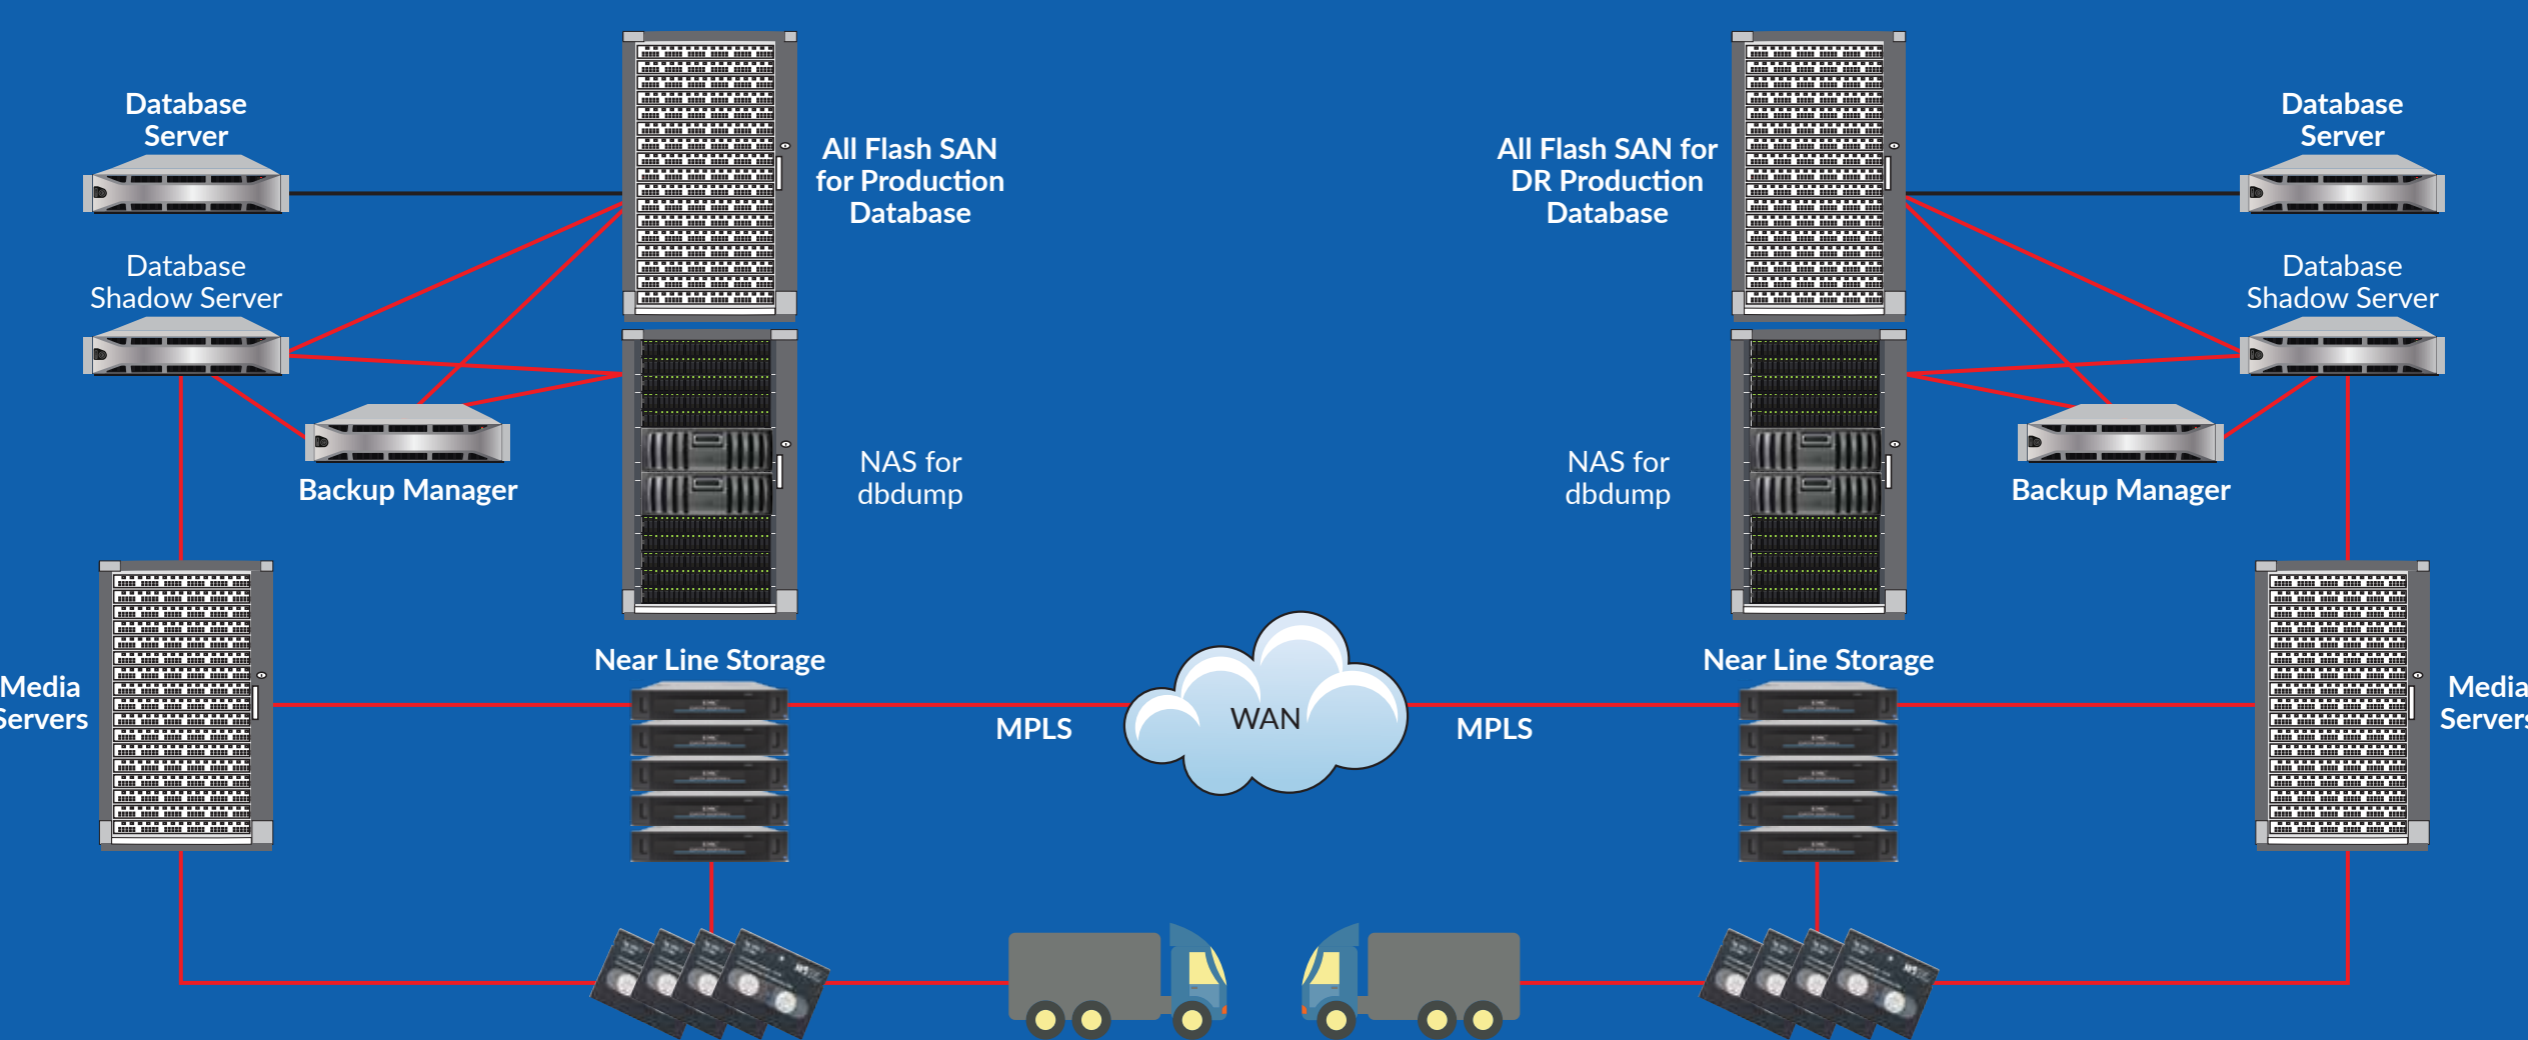

How DBAs and IT Implement Legacy Backup

THE RESULT?

A complex and costly solution that is full of redundancy and may even leave the enterprise out of compliance.

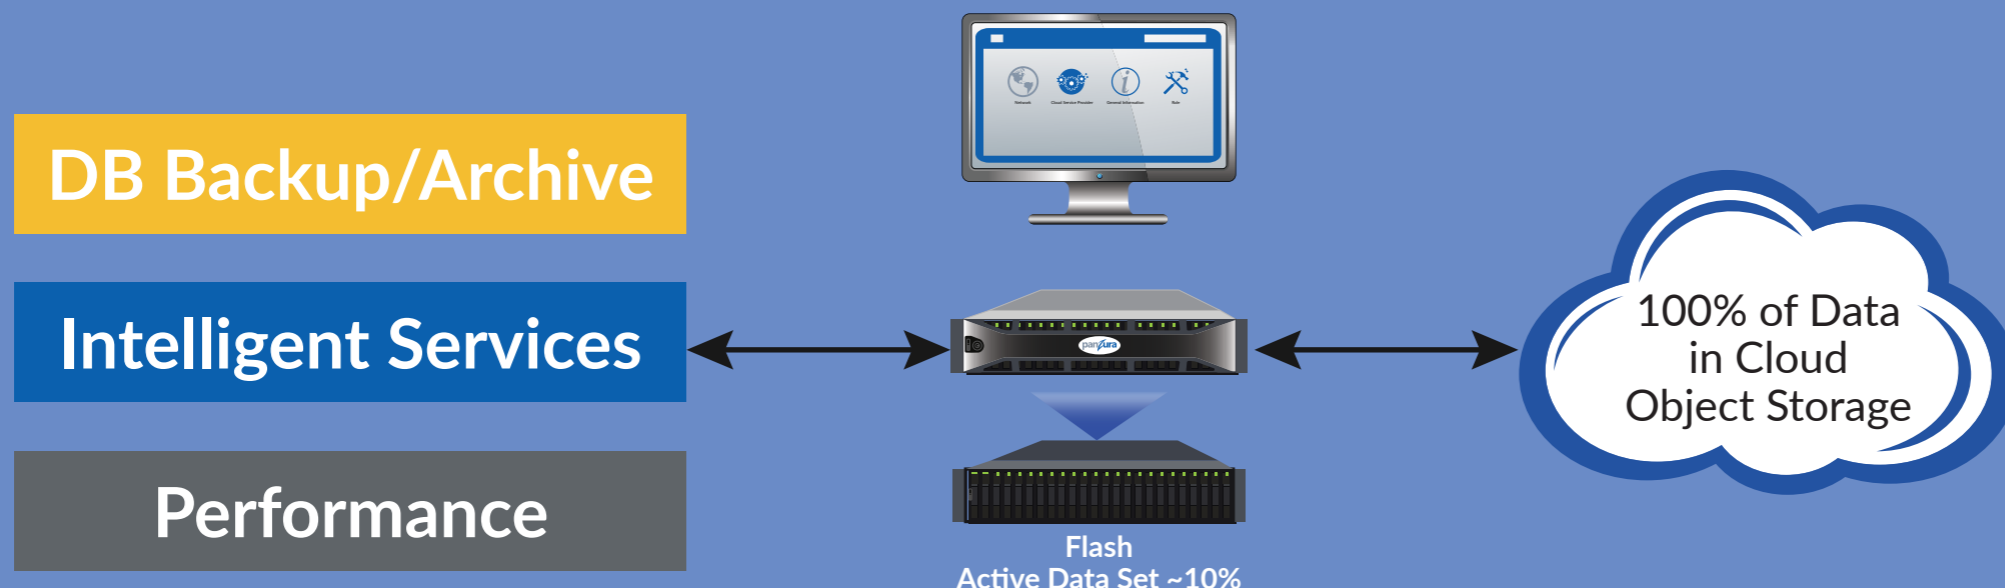

When You Add in Disaster Recovery it is 2x the Complexity and Cost!

Is There a Simpler Approach? Yes, Panzura Freedom.

In a cloud-first world, why would you target your database backups to tape, nearline disks, or other local solutions when you can easily target the cloud?

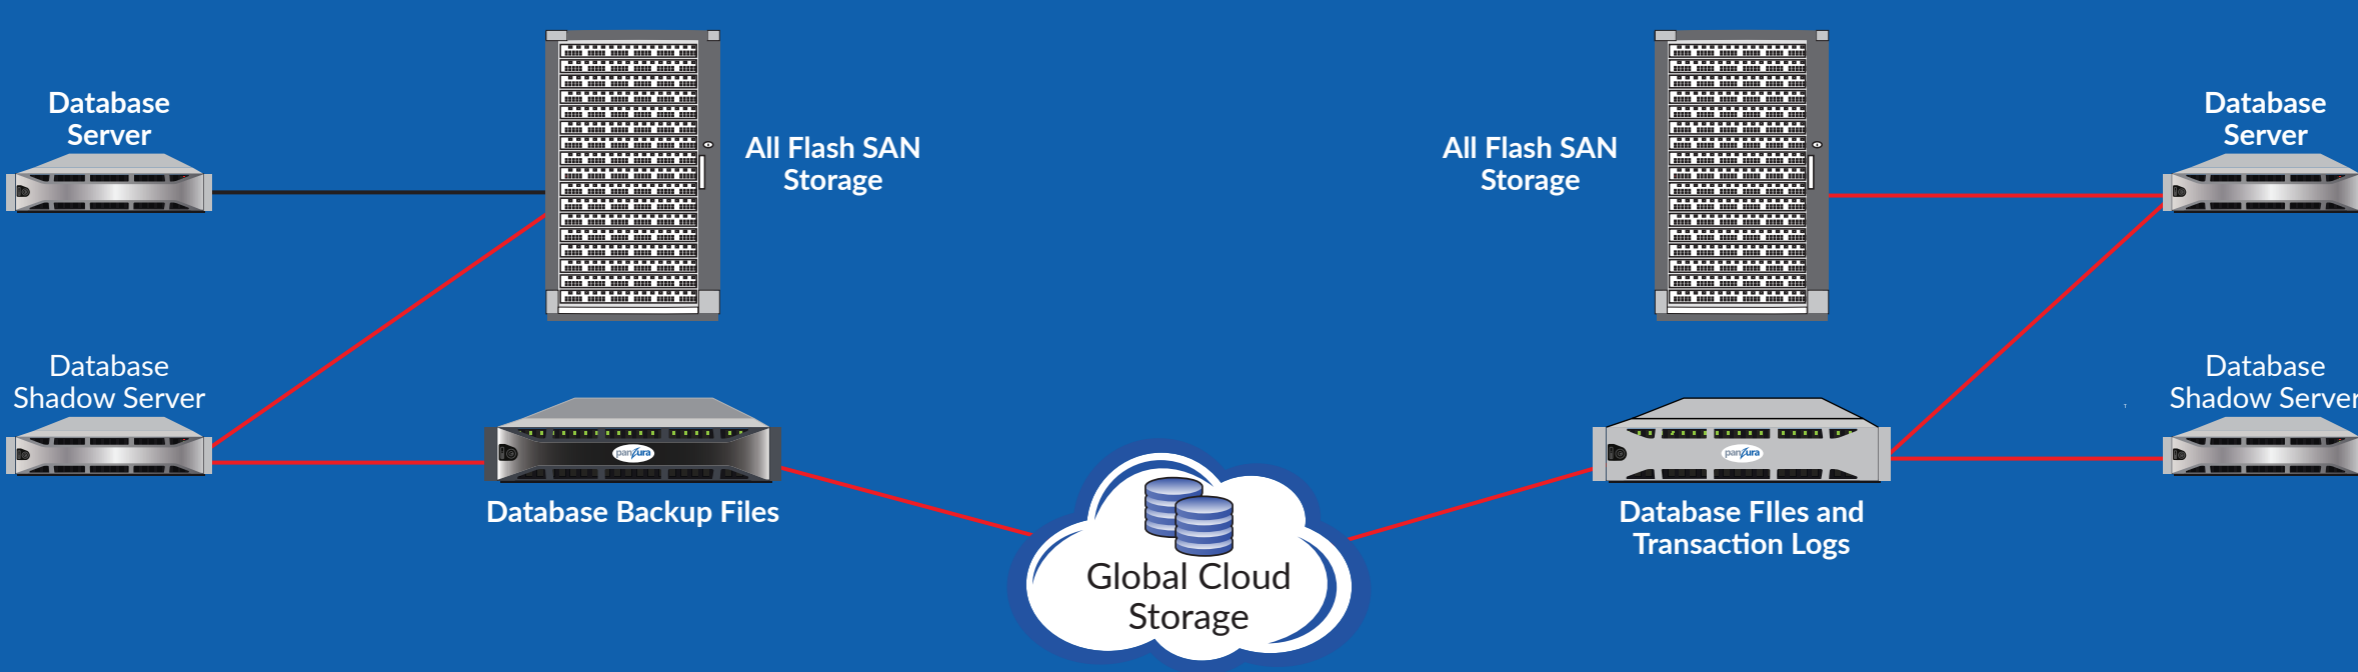

Panzura Freedom gives you a high-performance backup target that puts your data in the cloud for secure, long-term retention with immediate restore options anywhere.

Automate disaster recovery and backup processes for your enterprise database in the cloud.

- ✓ Exceptionally fast recovery
- ✓ Affordable long term retention
- ✓ Immediate compliance

Panzura Freedom: Transform Complex and Costly to Simple and Cost-Effective Cloud Disaster Recovery for Database Backups

Key Features

- In-cloud restore for cloud based DR
- In-cloud database verification and analytics
- Cloud scalability for storage
- Consolidation: no backup software, media servers, tape, MPLS, and site replication
- Multi-site backup and restore

Business Value

- Save up to 70% cost
- Manage PBs of data with a single VM or 2U appliance
- Single target for both DBAs and IT
- Achieve regulatory compliance for offsite DR and security

Cloud Disaster Recovery and Database Backups

Transform your complex and costly disaster recovery and backup processes to the cloud.

See how Panzura Freedom enables you to target your database backups to the cloud, giving you fast recovery, affordable long term retention, and immediate compliance.
