

Search, Audit, and Analytics

BUSINESS CHALLENGE

Businesses are plagued with data silos created by legacy NAS systems. As they expand their global footprint and increase market share, this problem becomes magnified, making it difficult to get the right data with the right teams. The cloud can become a data island, and operating in multiple clouds magnifies the challenge to create additional silos. Moreover, the cost of managing exploding data growth is always increasing. Adding to the complexity is the enterprise's ability to leverage the cloud while not compromising edge performance. Migrating data to and from the cloud is slow, which interferes with the organization's ability to perform data analytics and make timely decisions.

Panzura's Vizion.ai Benefits:

- Search and Audit Capability
- Recover and Clone Data
- Analyze Data Centrally
- Monitor Filer Health and Statistics

SOLUTION OVERVIEW

Panzura Gives You One Vizion of Your Data

Meet Vizion.ai, a multi-cloud data services platform from Panzura. Vizion.ai delivers a single, unified vision into data across the enterprise and provides powerful search, analysis, recovery, and control of multi-cloud data for greater productivity, operational intelligence, improved security, and central monitoring of your Panzura Filers.

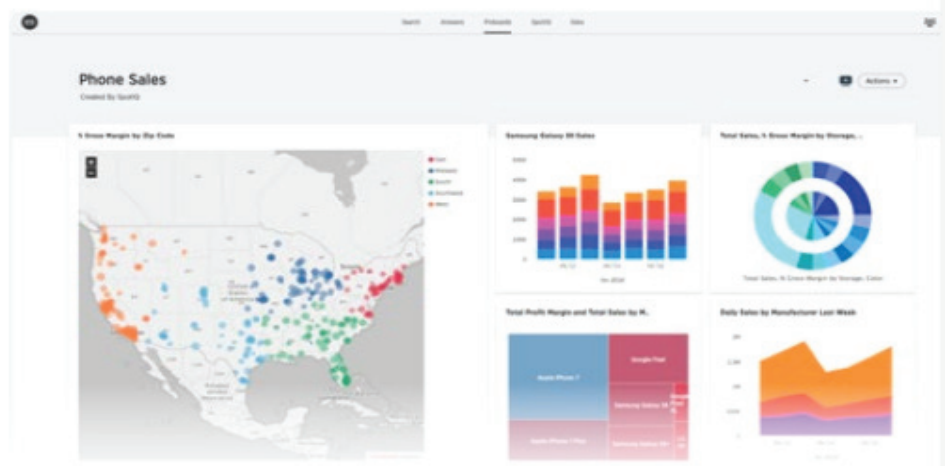

Speed of insight and breadth of data sources are the critical factors to help stand out in the marketplace.

Source: TDWI

Mid-to-large size enterprises have hundreds of tables, billions of rows, and thousands of users. The key to providing insights is to deliver a simple search experience at scale that returns answers to the user in less than a second.

It is nearly impossible to productively search for data in your enterprise. A Gartner report states that the average Enterprise spends \$2.5 Million a year to searching for data.

How do you search 350TB of data?

350 TB

average amount of data enterprises store

CUSTOMER BENEFITS

Vizion.ai multi-cloud data services gives you one place to easily search, analyze and control your data across the enterprise.

Search

- Search data throughout your enterprise with sub-second results
- Filter down by location, date, last modified time, and size.
- Easily find and gain access to previous versions of your files

Audit

- Audit your project files and folders to understand how users interact with your data.
- Understand if there are abnormal spikes in data growth or deletion.
- View who added or removed data, when they did it, what data is associated with it.
- Audit specific users by specified actions, dates, and time.

Recover & Clone

- Clone data to a different location for Dev Ops, testing purposes, or employee needs.
- Recover your data from a previous snapshot.

Analyze

- Analyze your data and filer statistics in a central place
- Understand what your hot, warm, and cold data is and who is accessing it.
- Easily understand your biggest files and folders
- Track how your storage is changing on a daily basis

Monitor

- Centrally understand the health and statistics of your filers.
- Receive customized alerts for abnormal occurrences
- Set Quotas for users and groups and receive alerts for custom thresholds.

About Panzura

Panzura is the leader in multi-cloud file and data management, which is a \$68B market opportunity. Its portfolio includes Panzura Freedom NAS and Vizion.ai. Freedom NAS provides software-defined, multi-cloud file services to enterprises in over 7500 sites globally. The Vizion.ai SaaS platform enables enterprises to meet the most demanding requirements for data search, analytics, and governance in a multi-cloud world. Panzura partners with cloud providers like AWS, Google, IBM, and Microsoft, and has over 400 resellers worldwide. Organizations like Fluor, Skidmore, Sony, Avis, American College of Radiology, LiveNation, Daimler, AFConsult, and Chevron use Panzura to consolidate and unlock the power of multi-cloud data management.
